

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning at page 9, line 14 (which published as paragraph [0056] in U.S. Patent Application Publication No. 2006/0011437 A1) with the following amended paragraph:

In practice the utilisation of the curved formation as shown in the Figures (e.g., the lid portion being shaped so as to have a convex main outer surface 8 and the base portion being shaped so as to have a concave main outer surface 3) has been found to enhance the handling of the case by a user. For example the lengthways curving of the base surface 3 leads to more comfortable handling whilst the case is being carried using the handle 22.
